crea.lign®

Veneering composite

Create natural beauty
Red-White Aesthetics

Implant-prosthetic restoration
© 2016 by DT Andreas Lüdtke, Bayreuth, Germany
The aesthetic and functional system with unique material options, helping you to create natural beauty, function and physiology. The open system provides flexibility and freedom thanks to six components designed to compliment one another: crea.lign®, novo.lign®, neo.lign®, visio.CAM, visio.paint & bond.lign.

The combination of these components allows a variety of workflows and implant prosthetic solutions, each with perfect results.

visio.lign® - the system for stability and reliability. The result: durable prosthetic restorations featuring colour stability and superior load capacity.
Truly natural and durable
crea.lign®
crea.lign\textsuperscript{®}: the material

\textbf{Δ E - tendency to discolouration}

Colouring substances:
Storage in coffee, tea, tobacco, red wine

![Graph](image)

New formula for crea.lign\textsuperscript{®}
Gel and GUM (light, pink, rosa, red, lila).

Benefits:
- Durable restorations thanks to high fracture toughness
- No fissures or cracks thanks to elasticity on the level of denture resins
- Unsurpassed curing depth thanks to special light transmission
- Direct layering on BioHPP\textsuperscript{®} is possible, no opaque required (when using visio.link\textsuperscript{®})
- Natural effect without translucency in the GUM materials
- Convenient modelling thanks to the improved stability of crea.lign\textsuperscript{®} gel
- Simple application of the pastes thanks to the enhanced consistency and reduced tackiness

“Unlimited flexibility”

Red & White with crea.lign®.

The solution for:
- implant-supported, fixed or removable permanent restorations,
- natural customisation of full dentures,
- all substructure materials such as BioHPP® and PEEK,
- complete coating even of full-arch restorations (e.g. Prettau bridges)
Layering schemes
crea.lign® Gel and crea.lign® Paste

“Your selection ...

Layering with
crea.lign® Gel
Layering with crea.lign® Paste
crea.lign® Paste PO (Paste Opaque) is applied in the mucolabial fold and crea.lign® Paste PL (Paste Light) is applied to the gingival margin. Then the surface is “stippled”. crea.lign® red/lila is filled in the resulting recesses and polymerised. Finally the surface is sealed with crea.lign® Transpa, smoothed and polymerised (end polymerisation).
The outstanding modelling properties and natural shade are what I appreciate about crea.lign® GUM Paste. Work can be easily completed and the results are fascinating.

DT Andreas Lüdtke
crea.lign® Gel
The crea.lign® Gel GUM veneering material takes the benefits provided by substructures made of high-performance polymers to the next level. Feeling in the mouth, aesthetic appearance and durability are a unique combination.

MDT Philipp von der Osten
Red-White Aesthetic Set

Individualise your restorations to achieve high-end aesthetics using the crea.lign® GUM materials in the visio.lign® system. Offer your customers this additional individual service and increase the profitability in your laboratory. Use your dentures to increase the reputation of your laboratory.

Contents:

- 5 x 5 g crea.lign® Gel, GUM (light, pink, rosa, red, lila)
- 2 x 3 g crea.lign® Paste, GUM (PO, PL)
- 1 x 5 g crea.lign® Gel, Modifier beige
- 1 x crea.lign® Gel, Transpa clear
- 1 x 4 g crea.lign® Opaque, GUM
- 1 x 10 ml crea.lign® Modelling Liquid
- 1 x 10 ml visio.link®
- 1 x Unique Brush, size 4
- 1 x One-hand use handle with UV LED (crea.lign® Gel)
- 1 x Mixing block
- 1 x Pin Cover + application cannulas
- 2 x Rotary piston (crea.lign® Paste)
- 1 x Layering instructions

The Aesthetic and Functional system

Overview of visio.lign®
media

crea.lign® veneering composite
A presentation of this high-end veneering material, its multiple applications and unique properties.

bre.Lux PowerUnit® 2
The LED light-curing device is optimised for processing crea.lign® - a short summary of the most relevant information.

neo.lign®
Denture teeth
Design and function of the neo.lign® denture teeth will fascinate you. Discover the variety of teeth and select your favourite design.
The light-curing composite features impressive natural opalescence and unparalleled light transmission for natural beauty.

The novo.lign® veneers feature an extended neck and a natural depth thanks to the morphological layer structure. The gold standard in implant prosthetics.

The novo.lign® veneers feature an extended neck and a natural depth thanks to the morphological layer structure. The gold standard in implant prosthetics.

The neo.lign® denture teeth feature the same shades, designs and materials as the novo.lign® veneers – optimised for fixed/removable restorations.

The material benefits from the visio.lign® system are also available for CAD/CAM processing. The blanks from the visio.CAM line are compatible with the entire visio.lign® system.

The visio.paint stains enable fast and simple individualisation of veneers.

The primer/bonder system for a permanent and secure chemical adhesive bond between all system components and common framework materials – including BioHPP® (PEEK).
